

## MS-2

### REMOTE START AND KEYLESS ENTRY APP INTERFACE MODEM

The MS-2 is a modem only device that plugs into any of our existing remote start and combo systems with a telematics or Smartphone port. The MS-2 will allow you to use the internet to lock, unlock, remote start/stop engine and pop the trunk. There is also has an app available for the iPhone and Android Smartphone that offers the same functions.

## MS-3

### REMOTE START AND KEYLESS ENTRY APP INTERFACE MODEM WITH GPS

The MS-3 system is the same as the MS-2 but also includes an on-board GPS modem as well. Now you can control the security and remote starting of your vehicle as well as getting a GPS location. There is also a "Car Finder" feature which will tell you the direction your vehicle is going from your Smartphone.

## MS-4

### OEM INTEGRATION REMOTE START AND GPS TRACKING SYSTEM WITH APP INTERFACE

The MS-4 is a remote start system, data module and GPS tracking device all combined in one compact module. Approximate size is 4"(L) × 2.5"(W) × 1"(D). This device utilizes the OEM keyless entry remotes, internet browser or downloadable app for operation. It controls all remote engine start and keyless entry functions as well as getting GPS locations and adding a car finder feature. The system comes included with an OBD-II T-Harness for easy installation into the vehicle and optional expansion harnesses are available for even more vehicle-specific compatibility. The optional expansion harnesses are sold separately. If the air-time service is not renewed, the system will stop the GPS locates but you can still use the OEM remote to remote start the engine and to control alarm functions.
